

Overall Energy & Fuels Markets Summary

- Summary of average spot prices for the following fuels (see page 1).
 - Crude oil (WTI and Brent) increased compared to the prior week.
 - Propane (Mt Belvieu) and Natural gas (Henry Hub) slightly decreased compared to the prior week.
- Regional fuels inventories (see pages 2 and 3) compared to the previous week:
 - Propane, total gasoline, and ultra-low sulfur diesel (ULSD) inventories increased.
 - Natural gas regional inventories increased as well and are near 10-year high inventory volumes.
- Market influencers include:
 - Global factors include the ongoing Russian invasion of Ukraine, continued economics concerns (example: recession), and fuels supply/demand dynamics (example: summer driving demand) continue to influence markets.
- National Oceanic and Atmospheric Administration (NOAA) forecast for New York/Northeast temperatures to vary throughout the state, with upstate to expect above average and downstate to expect below average temperatures for the next 1-2 weeks. They forecast near normal precipitation (Page 6).
- NY retail prices (see pages 4 and 5) for heating and transportation fuels:
 - NY transportation gasoline prices and diesel prices slightly decreased compared to the prior week.
 - All heating fuels prices decreased compared to the prior survey.
